//--set static directory for css and js folder

Syntax :

app.use(express.static(__dirname+'/public/'))

Example

```javascript
let express = require('express');
let app = express()
let dotenv = require('dotenv')
let bodyparser = require('body-parser');
let mongoose = require('mongoose');
let methodOverWride = require('method-override')

app.set('view engine', 'ejs');
app.use(express.static(__dirname+'/public/'))

dotenv.config({path:'./config.env'})

//for route route
    app.get('/', (req, res)=>{
        res.send('Hello Teach Coders')
    })

app.listen(process.env.PORT, ()=>{
    console.log(process.env.PORT, "Port Working")
})
```
